## Characteristics of 3rd Year Students Who Graduate OR FAIL TO GRADUATE IN 6 Years

As part of Fresno State's Graduation Rate Initiative (GRI), we are examining the characteristics of entering first-time, full-time freshmen (FTFTF) cohorts on a year by year basis as they progress through their undergraduate career. This allows us to see characteristics that distinguish students who are retained from those who leave during their first year, and the same for each subsequent year. Such information may point to interventions that can help more students graduate. The following research is focused on students who entered as FTFTF and enrolled in their third year. All findings are descriptive except the section entitled, "Factors Most Influencing Graduation." That section is based on logistic regression.

## Findings Summary:

## Profile of Students At-Risk in Their Third Year

1. Not enough units earned by end of $5^{\text {th }}$ semester to be classified as a junior
2. Cumulative GPA is less than 2.0 at beginning of $3^{\text {rd }}$ year
3. Term GPA is decreasing across their first 5 semesters
4. Enrolled part-time in $3^{\text {rd }}$ year or dropped out in $6^{\text {th }}$ semester
5. Completed few LD GE courses; especially failed to complete A1, B4, D1-3 and E1
6. Major is undeclared at beginning of $3^{\text {rd }}$ year

## Second Year Retention

Across 12 cohorts of FTFTF, retention into the third year is fairly stable (Table 1). The fall 2003, 2004 and 2008 entering cohort rates were the highest (at least 73\%). Nearly all of these students were enrolled full-time (12 units or more) at the beginning of their third year (Table 2).

## On Track

In a previous study, students who were on track to be sophomores (as defined by having earned at least 30 units) by the end of their third semester were substantially more likely to graduate than those who were not. Therefore, we looked to see if they entered their third year as juniors (having earned at least 60 units) or were on track to do so by the end of their $5^{\text {th }}$ semester. Students who are on track at the beginning or by the end of their $5^{\text {th }}$ semester are substantially more likely to graduate than those who are not on track and than those who earn junior status by the end of their third year (Table 3). About $1 / 3$ of students are on track at the beginning of their $5^{\text {th }}$ semester; another $1 / 3$ are on track at the end of their $5^{\text {th }}$ semester. These patterns are evident across eight cohorts.

## Full-Time/Part-Time Status

As IRAP's other studies have shown, students who enter as part-time are substantially less likely to graduate in six years than those who enroll full-time. (Note, however, that they are not included in the six-year graduation rate that is the focus of improvement efforts.) Few third year students are enrolled part-time (Table 2), but they are less likely than full-time students to graduate in six years (Table 4). Those who enrolled part-time in either their $5^{\text {th }}$ or $6^{\text {th }}$ semester, but full-time in the other, were more
likely to graduate than those who enrolled part-time in both semesters. Students who enrolled fulltime during both semesters graduated at much higher rates.

## Stop-Outs

A small number of students who leave during their third year eventually return and do so in time to graduate within six years (Table 5). This group increases the 6 -year graduation rate by 1-2\%. Another small group returns and graduates in 7 or 8 years. If this group had returned soon enough to graduate within the 6 -year window, it would have increased the 6 -year graduation rate by approximately 1-1.5\%

## Cumulative GPA in Third Year

As would be expected, students who begin their third year with a 2.0 or lower GPA are unlikely to graduate in six years. Only about 20\% do (Table 6). This compares to about 69\% who enter their third year with a cumulative GPA above 2.0. Students who begin their third year with a cumulative GPA below 2.0 but improve their GPA are more likely to graduate than if their GPA does not improve. However, even with improvement their graduation rate is still substantially lower than the rate for students with a higher cumulative GPA.

## Term GPA

Students whose Term GPA declined across their first five semesters were substantially less likely to graduate than those whose Term GPA remained stable or improved (Table 6A). The largest differences in graduation rates by Term GPA change are for those groups whose first semester GPA was 1-1.99 and 2-2.99.

## Lower Division General Education Completion

At the beginning of the third year, only a small percentage (5\%) of students had finished their lower division GE courses (Table 7). On average, they completed 9 of the 13 required courses. Therefore, they will likely be enrolled in lower division GE courses through their third year. Most had completed the Foundation courses (A and B4), E, C1 and D3. They were least likely to have completed Area B and a second C course.

The more of the required LD GE courses students completed during their first two years, the more likely they were to graduate in six years (Table 8). In particular, students who did not complete GE Area A1, B4, D1-3, and E1 by the beginning of their third year were less likely to graduate than those who did complete these courses.

## Major Declaration

By the beginning of their $3^{\text {rd }}$ year, most students (96\%) have declared a major (Table 9). That percentage has been increasing in accordance with the Student Success Task Force initiative that encourages students to declare their major early in their academic career. Students who have not declared a major by their third year are less likely to graduate in six years.

## Moving from GE to Major Courses

To test whether students begin having academic difficulty when they move from taking primarily GE courses to courses in their major, we looked at the academic standing of students in their $5^{\text {th }}$ and $6^{\text {th }}$ semesters to see if those on probation/disqualification status were in trouble for the first time or
whether they had been in academic difficulty before (Table 10). The percentages vary across the cohorts, but about $20 \%$ of those on probation/disqualification were first-timers. Most had academic difficulty before this point. This suggests that moving from GE to major courses may not result in lower grades for most students. However, this methodology is a rather crude approach in that many students take some major courses in their first two years and, as the data above show, many are still taking LD GE in their third year. Therefore, there is no clear demarcation of GE and major course-taking behavior between the second and third year, nor at any other point. Due to the wide variation in courses students can take, it is difficult to locate a group that is taking only GE courses in the first two years and major courses subsequently; this would be the best test of the question about academic difficulty when moving from GE to major courses.

## Factors Most Influencing Graduation

This part of the analysis is based on the FTFTF entering fall cohorts in 2002-2004 who enrolled in their third consecutive year. Of the 23 factors entered into a logistic regression model to predict the likelihood of graduating in six years, 12 factors were influential, though some have very small effects (Figure 1). The most important factors are having earned enough units at the beginning of the third year or by the end of the $5^{\text {th }}$ semester to be classified as a junior and being enrolled full-time during both semesters. Cumulative GPA and the trend in Term GPA are important as well. The combined factors in this model categorized $92 \%$ of those who graduated, but only $59 \%$ of those who did not. Additional factors are needed to better predict students' failure to graduate.

## Implications \& Recommendations

As with studies of students in the first and second years of their college career, academic achievement is the most important factor in ultimately graduating. Findings of this study suggest that monitoring GPA would be a worthwhile tactic since declining Term GPA is associated with lower six-year graduation. This may be particularly fruitful for those whose first term GPA is 2-2.99. If their GPA declines across three semesters, a letter from the university or personal contact may be encouraging. Interventions already exist for those with a GPA lower than 2.0, though it may be beneficial to review the process and effectiveness of those interventions.

Students who have earned enough units at the beginning or end of their $5^{\text {th }}$ semester to be classified as a junior are more likely to graduate than those who have earned fewer units. Again, monitoring may be a useful approach. Checking with students who, at the beginning of their third year, are not on track and not enrolled in enough units to finish the $5^{\text {th }}$ semester as a junior, may encourage them to enroll in additional units and/or provide us with more in-depth information about why students tend to be offtrack at that point.

Because students who enroll full-time in their first semester but drop to part-time are less likely to graduate in six years, it would be worthwhile to learn more about why these students enroll for fewer units. Could they not get classes they wanted or needed? Are they working? Did family circumstances change? Did their financial aid status change? Such information will show whether patterns exist and, if so, whether they are amenable to university influence or are individual choices beyond the university's control.

The number of students with an undeclared major at the beginning of their third year is small. These students should be referred to the Career Center where aptitude testing and guidance can help them find a compatible discipline to pursue.

Most students are still taking a considerable number of LD GE classes in their third year. This pattern should be better understood to determine why it exists. The fewer LD GE courses students have completed in their first two years, the less likely they are to graduate.

Table 6
3rd Year Cumulative GPA and Six-Year Graduation Rates (FTFTF Retainees in the Beginning of the 3rd Year)

|  | Cum GPA in the beginning of 3rd year | Cum GPA improvement in 3rd year* | Fall 1997 | Fall 1998 | Fall 1999 | Fall 2000 | Fall 2001 | Fall 2002 | Fall 2003 | Overall |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Total HC |  |  | 1,083 | 1,110 | 1,186 | 1,303 | 1,365 | 1,566 | 1,815 | 9,428 |
| By cumulative GPA group in the beginning of 3rd year |  |  |  |  |  |  |  |  |  |  |
| Headcount | Less than 2.0 |  | 128 | 124 | 153 | 24 | 135 | 151 | 205 | 920 |
|  | \% of total HC |  | 11.8\% | 11.2\% | 12.9\% | 1.8\% | 9.9\% | 9.6\% | 11.3\% | 9.8\% |
|  | 2.0 or above |  | 955 | 986 | 1,033 | 1,279 | 1,230 | 1,415 | 1,610 | 8,508 |
| Six-year graduation rate | Less than 2.0 |  | 18.8\% | 23.4\% | 14.4\% | 16.7\% | 22.2\% | 23.8\% | 18.0\% | 19.8\% |
|  | 2.0 or above |  | 68.8\% | 68.5\% | 66.8\% | 64.8\% | 71.5\% | 70.5\% | 70.0\% | 68.8\% |
| By cumulative GPA improvement group during the 3rd year |  |  |  |  |  |  |  |  |  |  |
| Headcount | Less than 2.0 | Drop out | 51 | 35 | 59 | 18 | 53 | 47 |  | 263 |
|  |  | Not improve | 16 | 21 |  | 2 | 18 | 24 |  | 81 |
|  |  | Improvement | 61 | 68 | 94 | 4 | 64 | 80 |  | 371 |
|  | 2.0 or above | Drop out | 78 | 71 | 68 | 153 | 102 | 119 |  | 591 |
|  |  | Not improve | 468 | 429 | 313 | 758 | 576 | 645 |  | 3,189 |
|  |  | Improvement | 409 | 486 | 652 | 368 | 552 | 651 |  | 3,118 |
| Six-year graduation rate | Less than 2.0 | Drop out | 3.9\% | 0.0\% | 1.7\% | 5.6\% | 7.5\% | 0.0\% |  | 3.0\% |
|  |  | Not improve | 12.5\% | 14.3\% |  | 50.0\% | 5.6\% | 16.7\% |  | 13.6\% |
|  |  | Improvement | 32.8\% | 38.2\% | 22.3\% | 50.0\% | 39.1\% | 40.0\% |  | 34.0\% |
|  | 2.0 or above | Drop out | 7.7\% | 19.7\% | 14.7\% | 8.5\% | 11.8\% | 17.6\% |  | 12.9\% |
|  |  | Not improve | 68.2\% | 60.4\% | 73.8\% | 65.0\% | 71.5\% | 66.5\% |  | 67.2\% |
|  |  | Improvement | 81.2\% | 82.7\% | 68.9\% | 87.8\% | 82.4\% | 84.2\% |  | 80.5\% |

* "Improvement" refers to that students' cumulative GPA in the end of 3rd year is larger than that in the beginning of 3rd year. Otherwise is "Not improve". "Drop out" refers to that students didn't enroll in the 6th or 7th semesters. The data on cumulative GPA in the end of 3rd year for Fall 2003 cohort are not available.

## Table 6-A

Term GPA Trend* and Six-Year Graduation Rates
(FTFTF Retainees in the Beginning of the 3rd Year)

|  | 1st term GPA | Term GPA trend* | Fall 2002 | Fall 2003 | Fall 2004 | Grand Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| HC |  | Decreasing | 989 | 1121 | 1003 | 3113 |
|  |  | Increasing or stable | 582 | 693 | 653 | 1928 |
| Six-year graduation rate |  | Decreasing | 59.0\% | 55.4\% | 59.5\% | 57.9\% |
|  |  | Increasing or stable | 78.0\% | 78.4\% | 79.8\% | 78.7\% |
| HC | 0-0.99 | Decreasing |  | 1 | 1 | 2 |
|  |  | Increasing or stable | 5 | 13 | 3 | 21 |
|  | 1-1.99 | Decreasing | 15 | 31 | 31 | 77 |
|  |  | Increasing or stable | 29 | 50 | 45 | 124 |
|  | 2-2.99 | Decreasing | 232 | 322 | 259 | 813 |
|  |  | Increasing or stable | 229 | 277 | 253 | 759 |
|  | 3-3.99 | Decreasing |  | 671 |  | $1920$ |
|  |  | Increasing or stable | 293 | 308 | 308 | 909 |
|  | 4 | Decreasing | 97 | 93 | 104 | 294 |
|  |  | Increasing or stable | 25 | 42 | 43 | 110 |
| Six-year graduation rate | 0-0.99 | Decreasing |  | 0.0\% | 0.0\% | 0.0\% |
|  |  | Increasing or stable | 20.0\% | 23.1\% | 33.3\% | 23.8\% |
|  | 1-1.99 | Decreasing | 20.0\% | 12.9\% | 12.9\% | 14.3\% |
|  |  | Increasing or stable | 51.7\% | 54.0\% | 62.2\% | 56.5\% |
|  | 2-2.99 | Decreasing | 37.5\% | 35.7\% | 39.0\% | 37.3\% |
|  |  | Increasing or stable | 68.1\% | 70.4\% | 68.8\% | 69.2\% |
|  | 3-3.99 | Decreasing | 64.5\% | 64.5\% | 67.5\% | 65.5\% |
|  |  | Increasing or stable | 87.7\% | 90.3\% | 89.0\% | 89.0\% |
|  | 4 | Decreasing | 81.4\% | 74.2\% | 78.8\% | 78.2\% |
|  |  | Increasing or stable | 96.0\% | 92.9\% | 100.0\% | 96.4\% |

* Term GPA trend is determined based on term GPAs in the first five semesters. First, the slope of straight (linear regression) line across term GPA points for each student is calculated; and then the slope is classified into two groups (decreasing if the slope is negative; otherwise, increasing or stable).

## Table 7

## LD GE Course Completion*

(FTFTF retainees in the beginning of the 3rd year)

|  | Fall 2002 | Fall 2003 | Fall 2004 | Fall 2005 | Fall 2006 | Fall 2007 | Overall |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

[^0]:    *3rd-year on track status refers to a student becoming a junior during the 3rd year. A student is considered on track if they become a junior in the beginning (5th), in the middle (6th), in the end (7th) of the 3rd year. Students who do not become a junior by the end of the 3rd year are considered 'Not on track.'
